

Connecting MediaMVP directly to a laptop or PC

You can connect the MediaMVP directly to a PC or laptop. To do this, you will need a 'crossover' cable, which you can either buy at a computer store or make yourself.

Here is how you connect the MediaMVP directly to your PC or laptop:

1. **Purchase or make a cross over Ethernet cable.** Examples of a crossover cable are the Belkin CAT 5e Crossover Cable for computer-to-computer connection
2. **Connect one end of the crossover cable** to the LAN port on the MediaMVP, and the other end to the LAN port on your PC or laptop
3. **Make sure the MediaMVP software is installed on your PC or laptop.** See "Installing the MediaMVP software" section. Leave your PC turned on.
4. **Connect the MediaMVP to the TV set,** and turn on the MediaMVP. You should see the 'Searching for PC server' on the TV set. On the PC, you should see a Windows message say '**Ethernet connection found**'

Since the direct connection from a MediaMVP to a PC is very fast, you will get maximum performance.
